

Permit Required Confined Spaces

Course Description

This course begins by providing you with a comprehensive exploration of general industry key concepts related to understanding and identifying permit-required confined spaces, covering crucial safety protocols, legal frameworks, and best practices crucial for worker safety in these demanding settings.

Then you will be exposed to the complex hazards associated with confined spaces, spanning atmospheric, physical, and biological dangers, and will learn about detailed strategies for hazard assessment, control measures, and the critical function of the permit system in maintaining worker safety.

Further, you will discover the vital processes involved in pre-entry preparation and the practices necessary for safe entry and work in confined spaces, highlighting the need for thorough training, clear communication, and the execution of emergency response plans to prevent potential risks.

Finally, you will be introduced to the essential safety practices of atmospheric testing and the specific roles and responsibilities required for safely managing permit-required confined spaces in the general industry. Explore techniques to identify and control invisible hazards that can turn everyday tasks into critical emergencies.

Learning Objectives

By the end of this course, you will:

- Understand and know what is expected of employers under the Legal and Regulatory Framework governing permit required confined spaces
- Understand the types of hazards that are associated with confined spaces
- Be able to identify hazards and implement control measures
- Formulate a plan for emergency response if required
- Understand essential safety practices including atmospheric testing procedures

Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training in around their work and personal life.

Modules

Course	Module Number	Module Name	Pass % Required
Permit Required Confined Spaces	1	Introduction to Permit-Required Confined Spaces	70
Permit Required Confined Spaces	2	Hazards and Control Measures	70
Permit Required Confined Spaces	3	Entry Procedures and Emergency Response	70
Permit Required Confined Spaces	4	Atmospheric Hazards and Testing	70

Recommended System Requirements

- Browser: Up to date web browser
- Video: Up to date video drivers
- Memory: 1Gb+ RAM
- Download Speed: Broadband (3Mb+)

Duration: 30 minutes *(Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions).*
