

Sharps Injuries and Lead Paint

Course Description

This micro course covers issues relating to biohazards in the workplace from needlestick and sharps injuries. You'll also learn about the signs and symptoms of lead poisoning and be shown safer removal methods to limit the chance of any issues arising.

Learning Objectives

By the end of this course, you will:

- Understand the risks of injuries from needlestick and sharps
- Be aware of the symptoms of lead poisoning
- Know how to remove lead paint safely

Target Audience

This course is aimed at workers who might come into contact with biohazardous materials as part of their work. This could range from medical and care staff to construction and maintenance workers.

Advantages

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

Modules

Course	Module Number	Module Name	Pass % Required
Sharps Injuries and Lead Paint	1	Sharps Injuries and Lead Paint	70

Recommended System Requirements

- Browser: Up to date web browser
