

Level 2 Health and Safety - Warehouse

Course Description

This course takes you through Working Safely, with specific additional content for workers who work within a warehouse setting. This section works through multiple topics which focus specifically on safety within a warehouse environment and discusses the five main causes of accidents, those being Slips and Trips, Manual Handling, Work at Height, Moving or Falling Objects and Vehicles in and around the Warehouse.

The section talks about the issues each of these five can cause and also how you can put measures in place to prevent these types of accidents occurring. It also outlines the steps you can take to make the warehouse and it's surrounding area a safer place to work for both yourself and your colleagues.

Target Audience

This course is a great induction course in relation to health and safety as it covers a wide range of topics in some detail.

Advantages

As this course covers a wide range of health and safety situations the course provides a strong basis to further build on with more training.

Online training is flexible, efficient and cost effective meaning the candidate can progress through the modules at their own pace and in their own time, so they can fit the training around their work and personal life.

Modules

Course	Module Number	Module Name	Pass % Required
